Declaration of Conformity with Directive (EU) 2024/825 (the "Empowering Consumers for the Green Transition" Directive)

The undersigned company hereby declares that all its products, packaging, and informational/promotional materials have undergone a thorough technical and legal analysis to ensure full compliance with applicable regulations—specifically, the requirements introduced by Directive (EU) 2024/825 regarding unfair commercial practices and consumer information for the green transition.

In particular, the company certifies the following:

1. **Absence of generic or vague environmental claims:** No generic environmental terms or claims—lacking adequate scientific substantiation or proof of superior environmental performance—are used on products, labels, or any company communication materials (examples include, but are not limited to: "eco," "green," "ecological," "sustainable," "reduced environmental footprint," or "sustainable packaging").
2. **Specific and detailed product declarations:** All references to the composition and origin of the raw materials used are supported by clear, transparent, and detailed information. For example:
    - **"Grass Papier" (Grass Paper) line:** The label explicitly and precisely identifies the botanical origin and the exact percentage of the plant/grass component used in the pulp mixture, providing the consumer with specific and unambiguous information.
    - **"ECOCARTA" Line (100% Recycled Paper):** The label clearly states that the fiber is 100% recycled and includes explanatory notes on the recovery supply chain, avoiding generic or misleading terminology.
3. **Prohibition of claims regarding climate neutrality and offsetting:** The company **does not use** assertions such as "net-zero," "carbon neutral," or "zero-impact" based solely on external carbon offsetting mechanisms, nor does it claim emission reductions for individual products without appropriate technical documentation and supporting certification.
4. **Transparency regarding labels, durability, and functionality:**
    - No sustainability labels or logos are displayed unless they are based on official certification systems or issued by recognized public bodies.
    - No misleading information is provided regarding the durability, repairability, or functional limitations of the products or their packaging.

Based on the assessments conducted and the internal controls implemented, we confirm that our products and their respective labels **fully meet the criteria required by the EmpCo regulations.**
